

CHRISTIAN F. COLADILLA

Web Developer

Caloocan City, Philippines • 09496963840 • iancoladilla23@gmail.com • coladilla-portfolio.vercel.app

PROFESSIONAL SUMMARY

Versatile Web Developer with 2 years of hands-on professional experience delivering full-cycle web solutions for real clients from discovery and design to deployment and maintenance. Skilled across the modern web stack including React, TypeScript, JavaScript, Tailwind CSS, Laravel, REST APIs, WordPress (Elementor Pro), Squarespace, and PHP. Proven ability to translate UI designs into pixel-perfect, performant, and mobile-responsive websites. Adept at migrating legacy systems to modern architectures and building scalable, maintainable codebases. A collaborative, detail-oriented developer with strong English communication skills and a client-first work ethic.

TECHNICAL SKILLS

Frontend Development: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap

CMS & Website Builders: WordPress (Elementor Pro), Squarespace

Backend & APIs: Laravel, PHP, REST API, MySQL, Oracle DBMS

Performance & SEO: Google PageSpeed, Core Web Vitals, Google Analytics (GA4), Google Tag Manager, Yoast SEO, SEO Optimization, Load Time Tuning

Design & Collaboration: Figma, Canva, Git, GitHub, Jira

Development Tools: Visual Studio Code, IntelliJ IDEA, NetBeans

Languages: English (Fluent), Filipino (Native)

PROFESSIONAL EXPERIENCE

Web Developer | *Developers HideoutPH Web Programming Services* (June 2024 – Present)

- Architect and deliver end-to-end production websites for diverse clients using React, TypeScript, Tailwind CSS, Laravel, and REST APIs, ensuring scalable and maintainable codebases
- Designed and launched the official Developers Hideout company website from initial concept through to live deployment, serving as both lead developer and primary designer
- Migrated multiple client WordPress sites to modern React + TypeScript + Tailwind CSS stack, significantly improving load times, SEO performance, and long-term maintainability
- Developed and customized WordPress websites using Elementor Pro, delivering tailored page layouts and advanced design components for client brands
- Integrated REST APIs to connect frontend applications with backend services, enabling dynamic content rendering and streamlined data workflows
- Built and maintained headless WordPress architectures, decoupling the CMS from the frontend for improved performance and developer flexibility
- Constructed responsive, cross-browser-compatible layouts optimized for all screen sizes, consistently meeting client design specifications
- Produced polished proof-of-concept websites for client pitches, directly supporting the company's business development and sales process

Technical Support Specialist (Intern) | *Reed Elsevier Shared Services Philippines Inc.* (March 2023 – June 2023)

- Provided technical support for enterprise-level systems, assisting hundreds of end users with hardware and software issues across multiple departments
- Diagnosed and resolved technical issues efficiently, reducing downtime and maintaining business continuity for internal operations

EDUCATION

Bachelor of Science in Information Technology | August 2019 – August 2023

Technological University of the Philippines – Manila

Information and Communications Technology (Senior High School) | June 2017 – March 2019

La Consolacion College – Caloocan

NOTABLE PROJECTS

Developers Hideout – Company Website

Sole developer responsible for designing and building the full company website from scratch, covering UI design in Figma through to production deployment using React and Tailwind CSS.

Manila Runway Republic – WordPress to React Migration

Led a complete platform migration from WordPress to a modern React + TypeScript + Tailwind CSS stack, improving site speed, SEO, and scalability for a fashion-focused client.

Headless WordPress Blog

Built a headless WordPress architecture decoupling the WordPress CMS backend from a custom React frontend via REST API, enabling a faster, more flexible content delivery experience.

Hodarizk – React + TypeScript Website

Developed a fully responsive client website from UI design to live deployment using React and TypeScript, adhering strictly to provided design specifications.

Coin-Operated Printing Kiosk – Full-Stack Thesis Project

Engineered a full-stack automated printing kiosk for the university thesis project, integrating coin-operated hardware controls with a PHP/MySQL backend and a custom frontend interface.
